

PHASE 1 UI WIREFRAMES

Meraki Practice Management Dashboard

Client-facing PDF mockups showing how the proposed internal practice management platform can appear on desktop screens. These designs convert the detailed markdown wireframes into a visual app shell for review and discussion.

Dashboards

Admin and staff views for due work, workload, reviews, bottlenecks, and time.

Operations

Clients, entities, proposals, engagements, tasks, workflows, and recurring work.

Controls

RBAC, audit history, sensitive data masking, due date overrides, and configuration.

Reporting

Filtered reports, exports, productivity, time utilization, and workload visibility.

02. Staff Personal Dashboard

Desktop screen preview
Assigned-work visibility

A role-limited daily workspace for assigned work, review points, and time capture.

18. Phase 1 Requirement Coverage

The visual PDF maps back to the detailed markdown wireframes and the RFP Phase 1 scope.

app.merakifinserve.com/wireframes/coverage

Client and entity

Central client records, groups, entities, owner, status, masked sensitive fields, generated client codes.

Engagement flow

Proposal, acceptance, engagement letter, service codes, generated task preview, engagement detail.

Task workflow

Templates, manual tasks, non-linear workflow, Waiting on Client, due dates, history, attachments.

Review controls

Checklist items, review points, carry-forward flags, item threads, reviewer sign-off.

Recurring operations

Year-on-year rollover, recurring schedules, staffing carry-forward, checklist/review carry-forward.

Staff and time

Profiles, reporting relationships, central reassignment, deactivation, time entry, utilization.

Dashboards and reports

Admin and staff dashboards, overdue work, pending reviews, productivity, time utilization, exports.

Configuration

Services, workflows, roles, priorities, templates, statuses, due date rules, code formulas.

Security readiness

RBAC, US-hosting assumption, tenant-aware data model, masked sensitive data, immutable audit trail.

Recommended next review topics

Decision	Why it matters
First services and task types to configure	Drives seed templates, due date rules, and workflow stages.
Exact fields for clients, entities, engagements, and tasks	Locks data model and form validation requirements.
Permission boundaries by role	Controls staff visibility and sensitive data access.
